## - FENDRESS nova generacija bokobrana na napuhavanje

Bokobrani specijalno dizajnirani za zaštitu i pomoć na privezima u marinama. Njihov veliki volumen u kombinaciji sa iznimno malom težinom i otpornošću pojednostavljuje rukovanje do krajnjih granica. Zahvaljujući ventilima i fleksibilnosti Fendress bokobrani se napuhuju i ispuhuju pa potom spremaju u spremišta iznimnom brzinom.

Jednom ispuhana, staju u vrlo mala spremišta.

Razlika između klasičnih bokobrana i nove Fendress generacije bokobrana je : iznimna lakoća, brzo napuhavanje i ispuhavanje, pospremanje u mali prostor, mekoća koja ne oštećuje brodske oplate.
